

Thanks,
Doc!

Thanks
for nothing,
Doc.

Healthy families have more fun, and flu bugs despise fun. It's why they don't like it when your doctor recommends the flu vaccine. So if you haven't gotten vaccinated this year, now's the time. Every flu season is different, and flu can affect people differently. Even healthy children and adults can get very sick from the flu and spread it to others. **That's why everyone 6 months and older should get a flu vaccine every year** — although the flu bug doesn't want you to know that.

**It's no fun having the flu.
Get vaccinated today.**
