

Family, friends, neighbors —

anyone on your 'team'
can get the flu!

Madi A.,
15 years old

The flu is serious. It disrupts lives causing you to miss out on daily activities or special events. For Madi, the flu just didn't keep her from doing the things she loves — like hanging out with friends or playing soccer and basketball — it put her in the hospital for 93 days!

Madi and her family received their flu vaccine each year — except the year that Madi actually got the flu! Everyone 6 months of age and older should get vaccinated every year. It is the safest and most effective way to protect yourself and those around you.

It's Not 'JUST' the Flu - It's a Serious Disease!

Get your flu vaccine today to
